DESIGN

Bilibo

Bilibo does not require instructions or batteries. The colorful plastic shells with their rounded curved shape are solely moved by the imagination of children. The soft curvature of the shell enables safe use as a seat for rocking and spinning, tortoise shell, hideaway and much more. The elementary shapes and bright colors appeal to the curiosity and play instinct of children. Bilibo promotes motor activity in various movement games or can be used as a versatile prop for role play. Depending on the specific interest and age of the child, different qualities become more prominent. This way, Bilibo is a companion for children for many years, practically growing along with them - whether indoors or outdoors, in the sand pit, near water, or in the snow.

Design:
Alex Hochstrasser

TOY NAME: Bilibo and Bilibo Mini
NAME OF DESIGNER: Alex Hochstrasser
DISTRIBUTOR: ACTIVE PEOPLE
YEAR OF DEVELOPMENT: 2001
MATERIAL: high-density polyethylene
RECOMMENDED AGE: 2/7 years
